

## Platform Decking Managers course

3 Education deliver numerous work at height courses that cover a broad range of solutions, including Platform Decking.

Platform Decking provides a lightweight, flexible access platform for the housebuilding industry (both timber frame and traditional). It is typically used by joiners, brick layers and flooring contractors. The Managers course is aimed at those who want to learn how to plan for the use of and manage Platform Decking.

### Outcome

At the end of this course, Candidates will:-

- Understand how a Platform Decking System works.
- Be able to plan for Platform Decking before installers arrive on site.
- Understand MIMs and industry good practice.
- Be able to identify faults and remedial solutions.
- Receive handover paperwork with knowledge.

### Competence

The Candidates are provided with a FASET Attendance Certificate valid for 3 years along with FASET Registration.

**Job Functions** include; workplace controllers, site/project managers & supervisors, health & safety professionals, planning coordinators and temporary works professionals.

### Facilities

Courses can be delivered at our centre in Buckinghamshire or on site.

All require "classroom" facilities and a practical area where an installed system can be inspected.

We will advise on the suitability of "away from centre" venues.

### Syllabus

- Introduction & Objectives
- FASET & Qualification Route
- How a Platform Decking system works
- Platform Decking Systems available
- Legislation & Standards
- Manufacturers Instruction Manual (MIM)
- Parts of a Platform Decking System
- Access Hatches
