

FASET STEP Inspection

FASET STEP Inspection is a course delivered by 3 Education that combines two of the work at height disciplines typically provided by Safety Net Installers; Stair Towers and Edge Protection.

It is based around the well established format of the FASET Safety Net Managers course.

Stair Towers are covered in a generic way; from pre-site planning, components and tying-in, to exits & handovers. The course includes reference to the appropriate sections of the relevant Standards.

Temporary Edge Protection Systems, supported by Engineers calculations will utilise a variety of components to build to BSEN 13374 Classes A, B, C. Detail on the Standard will help identify which system should be specified and how it should be built.

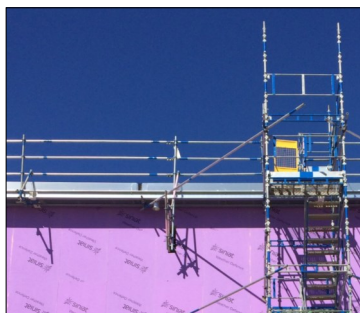

Planning & Management

Both sections of the course cover both pre start planning, build sequencing and ongoing post install checks.

It is geared towards workplace controllers, site/project managers & supervisors, health & safety professionals, principal designers and Temporary Works Coordinators.

Outcome

Candidates will know how to plan for & manage the safe installation of stair towers and edge protection, understanding what to expect from the installer before work starts. They will be able to complete the post install check list they create on the course to record faults, resultant issues & remedial solutions.

Syllabus

- Standards for Stair Towers & Edge Protection.
- Planning & Paperwork.
- Faults, Inspection of Systems.
- **Stair Towers**
- Parts of a Stair Tower.
- Limitations and tying in.
- Post installation checks.
- **Temporary Edge Protection.**
- BSEN 13374; Classes A,B & C.
- Components.
- Planning.
- Drawings.
- Faults, Inspection of Systems.
- Post installation checks.

Each session will conclude with a test and assessment of candidate knowledge.

Venue; Courses are generally held at 3 Education's training centre-(**Post code HP18 0JX**).

Contact 3 Education for other venue details.

Candidate numbers; Minimum 8, Maximum 12

Timings; 0830-1600.

Certification; Following course attendance and successful completion of the test, FASET issue a 3 year Certificate of attendance.

Specific Instructions

Courses held at our Training Centre include Lunch. There will be practical inspections, but no site PPE is required.

3 Education Ltd is a company with a unique learning concept. Specialising in work @ height across all sectors, the company creates and delivers learning programmes which encourage candidate interaction through the style of course delivery and follow up. 3 Education are the leading FASET training centre, delivering courses across the world. We work to the requirements of BS8454 and our instructors are PTTs qualified.
